- Enhanced legacy application by building new components in **React** and **JavaScript**
- Building new user-facing features using **React.JS**
- Experience in managing lifecycle of **MongoDB** database including database
- Used popular Node framework to **Express.js** to mock a API
- Some experience with backend techniques such as **NodeJS**
- Hands on experience in using of such software tools **Adobe Lightroom** and **Photoshop**
- Handled relational databases **MySQL** and **MongoDb**
- Experience in developing data applications in **Mac OS/Windows** environments

Skills

Languages	HTML, CSS, JavaScript and GraphQL
Frameworks	Bootstrap, Materialize CSS, React.JS, Node.JS and Express.JS
Databases	MongoDB and MySQL
Tools	Git, GitHub, Jira, Adobe Lightroom, Photoshop
Methodologies	Agile, SDLC and Waterfall
Others	SASS/LESS, Wordpress, API Design Knowledge, Leadership and Teamwork
Operating System	Windows and Mac OS

Education

University of Texas, Austin, TX | September 2021 - December 2021
Full-Stack Programming Professional Certificate

Texas State Technical College
Web Design and Development

Projects

Dietary Lifestyles Full Stack Node App

- **Feed Your Lifestyle** | <https://feed-your-lifestyle.herokuapp.com/> | GitHub Repo
- Role: Co-developer responsible for mostly back-end development including creating models, CRUD routes, and connecting back end to front end layouts.
- Tools: Handlebars, CSS, Express.js, Node.js, Sequelize, jQuery, Axios, ExpressSession, Heroku, GitHub

Experience

Epsilon

October 2020 - Present

Front-end Developer

- Designed dynamic and browser compatible pages using **HTML5, CSS3, LESS, SASS, Wordpress** and **JavaScript**
- Experience in **Bootstrap**
- Web design and development, application development using **Photoshop, HTML, JavaScript**
- Developed multiple POCs to create a user interface in **React.JS**
- A very good knowledge in using CSS frameworks and pre-processors like **Bootstrap, Materialize CSS** and **SASS/LESS**
- Implemented complex data visualization using **JavaScript**
- Used **React.JS** for templating for faster compilation and developing reusable components
- Developed single page application by using **ReactJS** and backed by **MongoDB** and **NodeJS**
- Handled web applications back-end part using **Node.JS** and **Express.JS**
- Experience in software tools **Adobe Lightroom** and **Photoshop**
- Used Grunt for task automation and GIT for version control
- Used **GitHub** repository for version control and implemented & maintained the branching and build/release strategies utilizing **GIT**
- Experience in developing data applications in **Mac OS/Windows** environments

McKinsey & Company

June 2019 - August 2020

UI/UX Designer

- Designed and developed the layout of the application using **HTML, CSS, JavaScript** and **Bootstrap**
- Utilizing CSS grid systems for responsiveness
- Utilizing **JavaScript, CSS** cross-browser compatibility and media queries
- Implemented Routers & History in Single Page App (SPA) using **React.JS**
- Handled **Node.JS** and **Express.JS** back-end development for dynamic database driven website
- Experience of using **Wordpress**
- Developed multiple POCs to create an interface between Backend to Frontend by using **Express.js**, and **Node.js**
- Involved in writing application-level code to interact with **APIs**
- Experience in database development skills like **MySQL** and **MongoDB**
- Good working Knowledge of **Jira** for Debugging and **Git** for version control
- Hands on experience of using **Agile, SDLC** and **Waterfall**
- Experience in developing data applications in **Windows and Mac OS** environments
